An online course at Helsinki University is available on the self-study website. I have learned about React, NodeJS, Redux, React Testing Library, and Cypress.

All my assignments and projects on the course are [here](#) and my certificate is [here](#)

PROJECTS

Web application for keeping track of children's daily activities

The purpose of this project was to develop a full-stack MERN (MongoDB, ExpressJS, React, NodeJS) website to register children's activities (such as playing, eating, and sleeping) during the day in a kindergarten. ([Source code](#))

E-Commerce Website

A basic e-commerce website is built with React, Redux toolkit, TypeScript, SASS, and React Router. The website has a shopping home page, a product details page, and a checkout page. It also has the LogIn and Register functions for users. The data for the website is fetched from the Platzi Fake Store API. ([Source code](#))

Reactivities

A social media that is built with React, TypeScript, C#, ASP.NET Core. The social media is for listing users' activities, Users can register the activity and also posting their activity event for others to join. ([Source code](#))

Netflix Clone

A website that is built based on Netflix using React, Firebase, and styled components. The project has a login and signup page. You can check out the page [here](#). ([Source code](#))
