PROFILE

I am a dedicated and detail-oriented IT professional with a strong foundation in software development and a passion for problem-solving. I am adept in various technology programming languages. I can effectively self-manage during independent projects and collaborate as part of a productive team.

WORK EXPERIENCE

ABB Oy, Helsinki 04/2023- 09/2024
Junior Software Developer

- Working in a Scrum team to develop and maintain software components for ABB Ability™ History.
- Contribute to a widely used software platform for industrial information management systems.

Integrify Oy, Helsinki 11/2022-10/2024
Full Stack Developer Consultant

- Completed a 5-month intensive training program focused on Front-end, Back-end, DevOps, and Cloud Development
- Gained hands-on experience in technologies such as ReactJS, C#, ASP.NET, and Azure.
- Delivered software development consulting services for client projects, collaborating with cross-functional teams to implement solutions.

Advanced Network System Vietnam 09/2021-02/2022
Software Developer Intern

- Developed and maintained small components for web-based systems.
- Assisted in troubleshooting and resolving technical issues.
- Supported the creation and execution of test cases to ensure system functionality.

EDUCATION

Bachelor of Engineering in Information Technology 2018-2022
Vaasa University of Applied Sciences

FullStackOpen 05/2021-12/2021
An online course at Helsinki University is available on the self-study website. I have learned about React, NodeJS, Redux, React Testing Library, and Cypress.

PROJECTS

Web application for keeping track of children's daily activities

[Source Code](#)

The purpose of this project was to develop a full-stack MERN website to register children's activities (such as playing, eating, and sleeping) during the day in a kindergarten

Reactivities

[Source Code](#) - [Review the website](#)

A social media that is built with React, TypeScript, C#, ASP.NET Core. The social media is for listing users' activities, Users can register the activity and also posting their activity event for others to join.

E-Commerce Website

[Source Code](#) - [Review the website](#)

A basic e-commerce website is built with React, Redux toolkit, TypeScript, SASS, and React Router. The website has a shopping home page, a product details page, and a checkout page. It also has the LogIn and Register functions for users. The data for the website is fetched from the Platzi Fake Store API

Flashcard App

[Source Code](#)

A vibe coding web application building a flashcard application with Claude. The app is built with TypeScript, React, and TailwindCSS
